

SmartCharge 6A + Li

Item number: 712006

SmartCharge 6A + Li

Portable battery charger

A very userfriendly battery charger who is solving most of the charging jobs at home, in your caravan or your boat and for more professional jobs. SmartCharge represents the latest technology within battery charging which will give the battery optimum life.

Use

Take time to read the user manual and follow the instructions before using the charger!

Functions

- Backlit user friendly interface and display
- Integrated cable management.
- It will never over-charge your battery.
- Temperature compensated charging cycle (only for standard charging curve, not Lithium).
- Possible to charge lithium batteries with integrated Battery management system (BMS).

Specifications

Item number	712006
Input voltage	230, 50-60 VAC, Hz
Charge power, max	115 W
Inverse current	< 1 mA
Output voltage	14,4 VDC
Operating temperature	-40 ~ +40°C
Cooling	Air
Type of batteries	Lead acid battery (open and closed types), AGM, EFB, GEL and lithium batteries with integrated Battery management system (BMS).
Battery size	12/10-150 V/Ah
IP rating	IP 65
Isolation class	cl II
L/W/H	Charger: 210x90x54 mm (LxWxH) Box: 252x102x55 mm (LxWxH) Volume: 1,41 dm ³
Weight, brutto	735 g
Certifications	EN60335-1, EN60355-2-29, EN 61204-3, EN61000-3-3, EN61000-3-2 DEFA AS is conforming to the requirements ISO 9001, ISO 14001 and ISO 45001. In addition to this, our engine heaters and cables are conforming to the requirements of IATF 16949.
Packaging	Single pack only. A variety of SmartCharge accessories are available.
