## Power Supply 1204R Flex

Item number: 453121

### Power Supply 1204R Flex

With integrated relay for switching the DEFA engine and interior heater on and off.

DEFA Power Supply 1204R Flex is a 12,9V / 4A power supply that is more compact than similar power supplies in the category, and it fits easily into most engine compartments. With flexible 120V cables, fused DC cables and mounting bracket, the power supply is easy to install.

#### Installation

The power supply must be installed in accordance with the installation guide and DEFA's original connection equipment must be used, see specific installation guide.

#### Use

- 12V output voltage
- Maximum 4A current
- Indicator light during use: Green light - normal operation, red pulse - error
- Power distribution to DEFA engine heater and interior heater
- Integrated relay for switching DEFA engine heater and cabin heater on and off
- Splashproof (NEMA Type 3)

The power supply works whenever the system is plugged in. It works independently of the programmable control unit (if applicable) for the car heating system.

#### Technical specifications

| Technical specifications                                |   |
|---|---|
| Item no.:   | 453121  |
| Type:   | DCM1204RNAM   |
| Input Voltage[VAC/Hz]                                   | 100-120/60  |
| Output Voltage [VDC]                                    | 12.9  |
| Maximum Current [A]                                     | 4   |
| Operating temperature [°C/F]                            | -40 to +50/-40 to +122  |
| NEMA rating   | Type 3, when cables are connected                             |
| 120V PlugIn outlet [A]                                  | 14  |
| Fuse size 12V [A]                                       | 7,5   |
| Weight [g]  | 325   |
| HxWxD [mm/inch]   | 107x71x38 / 4.2x2.8x1.5                                       |
| The power supply is tested and satisfies the standards: | UL 1236, CSA C22.2 No. 107.2, ICES-003, FCC Part 15 Subpart B |
