

DEFA Solid™
Solid Simplicity

DEFA Solid - Solid Simplicity

Robust charging solution with Nordic design

A solid and convenient EV charger giving you the power you need. DEFA Solid has a robust design made for extreme conditions. The premium charging cable and intuitive interface with energy saving simplifies your daily use and lowers your energy costs.

Robust charging solution

The EV charger has a robust design made for extreme conditions. The premium integrated charging cable keeps flexible even in severe cold. Up to 4.6 kW

Easy to use

DEFA Solid has an intuitive interface, with an on/off button that is also used for energy saving. Connection is easier with an integrated cable, and you can wrap the cable around the charger when it's not in use.

Energy saving

You can control your power consumption by activating EcoMode with the intuitive Select button on the display. You can avoid charging when power is most expensive.

Easy and flexible installation

Your electrician can easily install DEFA Solid with the included wall bracket and quick connectors, utilizing available power infrastructure. The charger has an integrated rotational dip-switch for amp-setting. Choose between 4.6kW, 3.6kW or 2.3kW if the charging station is set to 20A.

Integrated charging cable

DEFA Solid has a 6 meter charging cable which provides flexibility for daily use and when connecting to the car.

The vehicle plug cap is fastened with an adjustable strap that lets you pull it away from the car during charging. The strap is fastened on the back of the cap so that it is left hanging upside down and doesn't collect water, snow and dirt. This smart solution also prevents scratches on your car.

Made for extreme conditions

The charging cable remains soft and flexible, even in severe cold. This makes them much easier to handle, coil and store when temperatures are low.

eConnect™ Docking Type 2

Cable storage dock

The integrated charging cable can be wrapped around the charging unit, or you can also use the eConnect docking to keep your charging cable tidy when not in use.
