

Night Reduction - NR

- ▶ Inexpensive form of automatic reduction of outdoor lighting during low traffic periods
- ▶ Now demand for extra operations during installation
- ▶ No demand for programming or control signal on site
- ▶ The light turns on/off with photocell or Astro watch (timer) as normally
- ▶ Preprogrammed with 6h night reduction 50% from hr 23.-05, other time periods on request
- ▶ By use of standard NR power savings of approx. 25% of the total consumption
